

What is claimed is:

1. (*currently amended*) A diaper construction, comprising:
  - a diaper wrap garment constructed of a textile fabric having inner and outer surfaces;
  - a first plurality of hook and loop connector parts secured to the inner surface of the diaper wrap garment in a predetermined configuration;
  - a further pair of hook and loop connector parts secured to the outer surface of the diaper wrap and joinable with certain of the plurality of connectors;
  - a liquid absorbent biodegradable insert of generally sheetlike construction, said insert having a geometry closely similar to that of the diaper wrap garment; and
  - a second plurality of hook and loop connectors secured to the insert joinable with certain others of the first plurality of connectors for releasably securing the insert to the diaper wrap garment.
2. (original) A diaper construction as in claim 1, in which the insert is constructed of a plurality of liquid absorbent paper sheets.
3. (original) A diaper construction as in claim 1, in which the garment and insert are each elongated with generally parallel opposite end edges and opposite side edges curved inwardly toward each other.
4. (original) A diaper construction as in claim 3, in which the second plurality of connectors include a first spaced apart pair arranged along one edge and a second spaced apart pair arranged along the opposite end edge, said second plurality of connectors each being of L-shape.
5. (new) A diaper construction as in claim 4, in which the diaper wrap garment is pants-like and a cotton material.
